### FOLK AFTER NEW YORKERS.

## Eastern Capitalists May Be Indicted

for Boodling in Missouri. ST. LOUIS, Mo., July 1.-Circuit Attorney Folk has information which may lead to the indictment of Eastern capitalists for bribery in connection with the transit bill, which was passed by the Missouri Legislature in 1899. The statute of limitation prevents prosecution of those persons living in Missouri who are alleged to have been connected with the deal, but those living in New York are not protected. It is understood that such indictments would have to be found by the Cole county grand jury, as the deal was made in Jefferson City, Mo. Should the indictments be voted, the whole boodle story would doubtless come out for the first time.

Several capitalists in New York were interested in the bill which made possible the consolidation of the street-car lines in St. Louis, save the suburban, and it is reported that they authorized the expenditure of \$150,000 to obtain the desired authority to consummate the deals. The legislative | probably will hang on the testimony of Dr. keeping a horse, which must be taken out all the money necessary to overcome the objections of any member of the Legislature. the chain of evidence in a few days.

## DEEDS TO UNBORN HEIRS

Upheld by Judge Ryan in the Madison County Circuit Court.

parties.

ANDERSON, July 1.-Judge H. C. Ryan handed down an important ruling in his court last night, holding that property can be rightfully deeded to heirs yet unborn. In 1876 George J. Davis deeded a farm near this city to the bodily heirs of his son, Milton R. Davis, but the son was to enjoy the rentals during his life. Milton died in 1889, but before his death he had sold the farm to George Eggman. On his deathbed Milton Davis confided to his children the terms of the deed by which he enjoyed the rents of the farm and told them it rightfully belonged to them and they should sue for its possession. They did so. The case has been in the courts for years. The defense set up that there were no children at the time of the conveyance of the property. The plaintiffs alleged that their right was valid because it was deeded to children even before they were born. Judge Ryan held for the praintiffs, and at the same time issued an order for Eggman to vacate, holding that the sum paid for the farm was consumed by him in rentals during the period in which he has

The State is trying to prove that an unsigned letter received Gillingham asking for information as Drake's possessions was written by Drake. # St. Louis Wheat Brokers Effect a Com-

ST. LOUIS, July 1.-The dumping of mil lions of bushels of July wheat on the market to-day, largely by Thomas A. Cleage, following a decline of over 10 cents since Friday and the consequent calls for margins, coupled with the delivery of considerable cash wheat, resulted in the failure of W. C. Lamping & Co., brokers for Cleage, to meet margin calls. William C. Lamping declared that the firm would pay dollar for dollar. John Thyson, of the John on his house had been met and all cash

wheat paid for, and the firm was in good shape. The firm had taken \$10,000 cash wheat off the hands of Lamping. Creditors of the firm to-night effected a compromise settlement which will prevent the throwing of a million bushels of grain on the market to-morrow and will enable the embarrassed firm to close its deals at a figure below the closing market price Brokers representing about one-third of the wheat involved formed a pool and agreed to settle with Lamping on a basis of 754c for July and 74c for September wheat and 48c for July and 49c for September corn. The closing prices were 76%c and 74%c for wheat and 48c and 49%c for corn. The pool will also take care of Lamping's

### Mysterious Name That Has Puzzled Newspaper Readers.

New York Commercial.

Who is Lazard Freres?

At intervals there appears in the tele-graphic reports in hundreds of newspapers throughout the country a short dispatch from New York announcing that "Lazard Freres will to-morrow ship to Europe millions of gold."

For years these dispatches have been sent out from New York-nothing else about Lazard Freres except just that. There has never been any explanation of who he is or what he is or why he isnothing but the monotonous iteration and relteration that "to-morrow Lazard Freres will ship to Europe — millions of gold.'
Populist politicians in heated political political campaigns have inveighed against "him" as some sort of a monster-a gold bug, a blood-sucker, whose sole object in life was to collect all the gold in Wall Street and ship it to Europe. Their only knowledge was gained from that oft-published pressdispatch with its never-changing rhythm.

In the street there are a lozen foreign exchange brokers no more pretentious, no less. They import and export gold. They are all industrious, husting, capable business men, whose knowledge of international finance is beyond the Lazard Freres is a firm of Jew bankers in Paris. They have branches in New

They never thought it worth while to translate the French "freres" to the English "brothers," so "Lazard Freres" goes out to the country-where French as a language is more honored in theory than practice-in the press dispatches, and he is thought to be a pretty big man to be able to buy so much gold for export.

Why gold is ever shipped is a little story by itself. When the flight of negotiable paper transatlantic becomes markedly un-

even and there remains none on the other side to balance our indebtedness, the rates

of exchange grow. They grow until Lazard

Freres see a tiny margin of profit in each pound sterling they can ship to London, after paying a week's insurance, drayage and freightage—so, out goes over the country another press dispatch.
